The capital of the United States asks: just how could such a thing happen here?

From Kathy Kay in Washington

THE question of what being a cut with the red sign reading "no smoking" other signs by the side had no idea why his bed had been moved outside on to Washington's grassy Mall.

He did not know that his creation, the city's Ronald Reagan statue, had been evacuated after terrorists flew a hijacked aircraft into the side of the Pentagon.

Lying under a tree, peering at the leaves, the baby was one of the few human beings in the capital yesterday who was blissfully unaware of the disaster that had struck the city.

Everywhere else in Washington was stunned and the war machine worked seeing amid the horror.

"It's like watching a disaster movie unfold. I don't think we will ever see anything like this again in our lifetime," Joseph Lashley, who works in a government building opposite the White House, said.

"It would have brought Washington to its knees," Andrew Stone, a local resident, said. "With America's huge security forces, how could this happen? I feel sick right now."

St Paul's to reopen but may sue protesters

St Paul's Cathedral is to reopen tomorrow, a week after it closed because of concerns about fire hazards, the risk of injury to life and limb and public health here.

Officials insisted yesterday that there were no regrets about the decision to shut for what turned out to be a longer period than during the Blitz. Some saw it as a humiliating climb-down because they have been no significant health and safety changes at the 200-year-old church since the concerns were raised.

St Paul's has not softened towards the presence of protesters. As the Corporation of London prepares to decide on legal action tomorrow, sources indicated the cathedral may join it.

The decision to reopen in time for the 12 Days of Christmas on Friday, subject to a final risk assessment being welcomed. The closure is likely to have cost the cathedral about £100,000 in lost visitor revenue.
